**EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jonathan Bay on September 13, 2007.

The application has been amended as follows:

The title has been changed to "Method of Producing Simulated Human Tissue Using Candy Cores".

In claim 8, all language within parentheses, including ---(4)--- in line 1, ---(1) --- in line 2 and ---(2%)--- in line 3 has been deleted.

In claim 12, line 3, ---(18° F)--- has been deleted.

In claim 13, line 3, ---(18° F)--- has been deleted.

In claim 18, all language within parentheses, including ---(4)--- in line 2, ---(1) --- in line 3 and ---(2%)--- in line 3 has been deleted.

In claim 20, line 3, ---(18° F)--- has been deleted.

In claim 21, line 3, ---(18° F)--- has been deleted.

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest a device having all of the claimed limitations. While various references such as Barba and Josephson disclose candy items in the shape of a human, and various methods of creating simulated human tissue are known, there is no motivation or suggestion to provide a method of dipping candy cores into a polymer having all of the method steps of claim 1. As a result, claim 1 and its dependents are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lalka, Biermann, Burtscher, Colvin and Schneider disclose various anatomical models and methods of production. Barba, Wiggins, Harris and Josephson disclose food products in the shape of a human or animal.
